AIRBUS A320 · CABIN · EMERGENCY EQUIPMENT

A320 Cabin Safety

User Manual

Version 1.0 · Android tablet / phone · Windows PC

Installing, the license code, the equipment chart, the quiz and the exam.

For familiarization and training purposes only. Always follow the airline's own equipment chart and procedures.

CONTENTS

Table of Contents

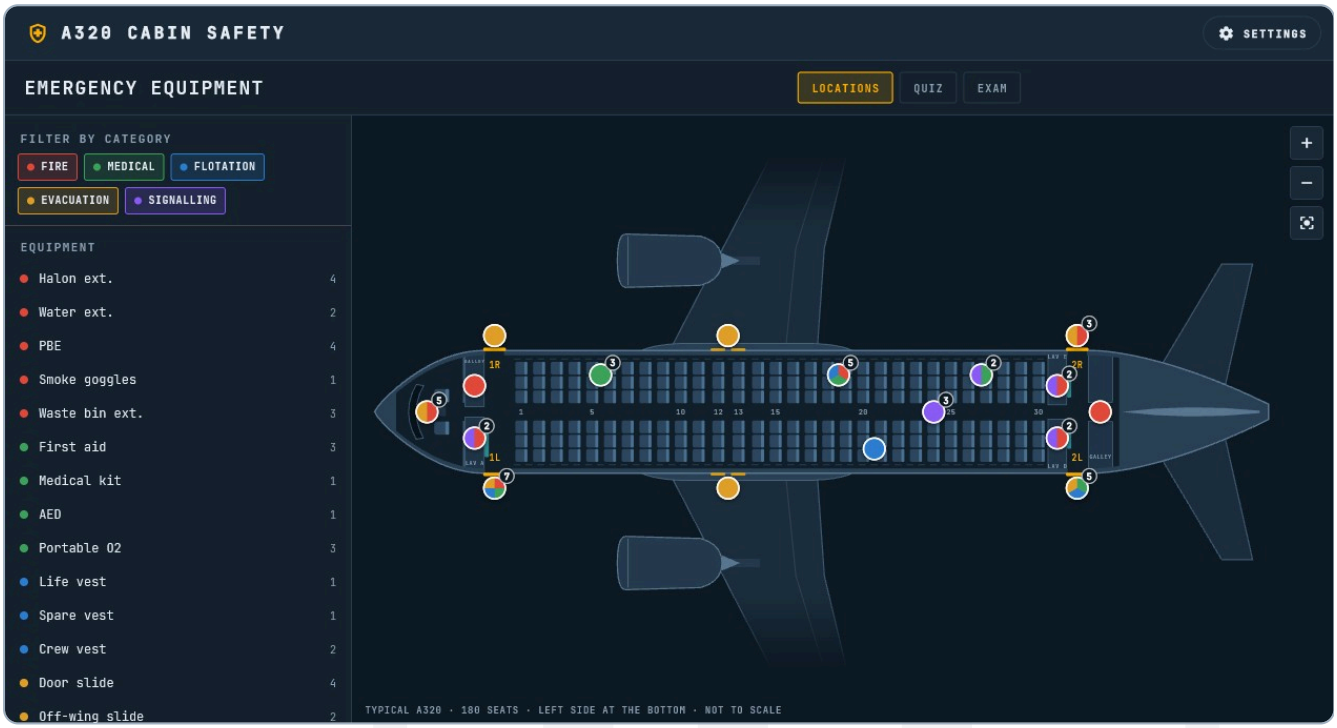

01	About the App	What it shows, the screen
02	Installing	Android tablet or phone, Windows PC
03	First Start and License	Notice, license code, moving devices
04	LOCATIONS	The chart, markers, filters, zoom
05	QUIZ	Practice: one item at a time, feedback on each drop
06	EXAM	10 shuffled items, any order, score at the end
07	SETTINGS and Updates	
08	Troubleshooting	
09	Important Notice	

CHAPTER 01

About the App

A320 Cabin Safety shows where the emergency equipment is stowed in an Airbus A320 cabin, on a top view of the aircraft, and lets you test yourself with a drag-and-drop quiz.

The screen

LOCATIONS: the A320 chart with one marker per stowage location

Part	What it does
Header	App name and the `SETTINGS` key.
LOCATIONS / QUIZ / EXAM	Switch between the equipment chart, the practice quiz and the exam.
FILTER BY CATEGORY	Show or hide Fire, Medical, Flotation, Evacuation and Signalling items.
EQUIPMENT	Every kind of item with its total number; tap one to highlight where it is.
Chart	The aircraft seen from above. Markers show where equipment is stowed.
Zoom keys	`+` `-` zoom; the target key resets the view.

Categories

Fire · Medical · Flotation · Evacuation · Signalling

CHAPTER 02

Installing

The app is installed from a file (it is not on an app store).

Android tablet or phone

1. Download the APK file you were given and open it.
2. If Android asks, allow **Install unknown apps** for your browser or file manager.
3. Tap **Install**, then open **A320 Cabin Safety**.

Windows 10 / 11 PC (64-bit)

1. Run the Setup file.
2. If Windows SmartScreen appears, choose **More info**, then **Run anyway** (the installer is not code-signed).
3. Open **A320 Cabin Safety** from the Start menu or the desktop.

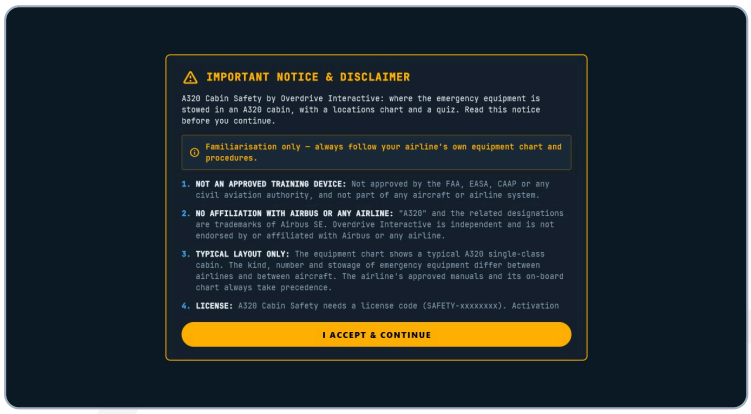

CHAPTER 03

First Start and License

The first time the app runs it shows a notice, then asks for a license code.

The notice

Read it and tap **I ACCEPT & CONTINUE**. It is shown only once.

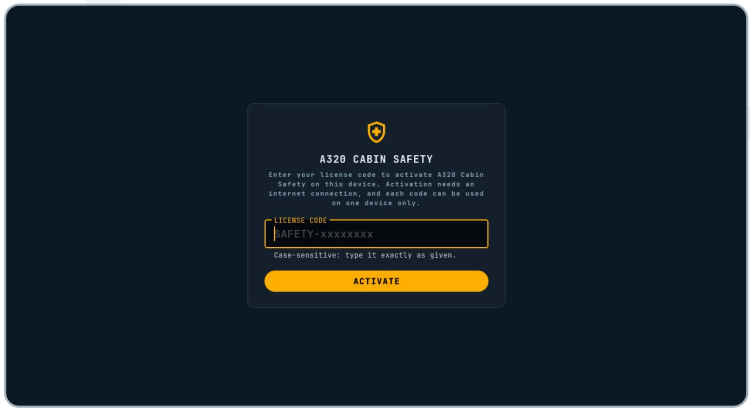

The notice

Activating the license

1. Connect the device to the internet (needed only for this step).
2. Type the code exactly as given, for example `SAFETY-k7Rm9Qx2`. Capital and small letters are different.
3. Tap **ACTIVATE**. After that the app works offline.

> **ONE DEVICE AT A TIME**
>
> A code works on one device. Reinstalled the app on the same device? It recognises the device: tap **CHECK AGAIN** while online. Moving to a new device: ask your administrator to release the code, then enter it on the new device.

The license code screen

CHAPTER 04

LOCATIONS

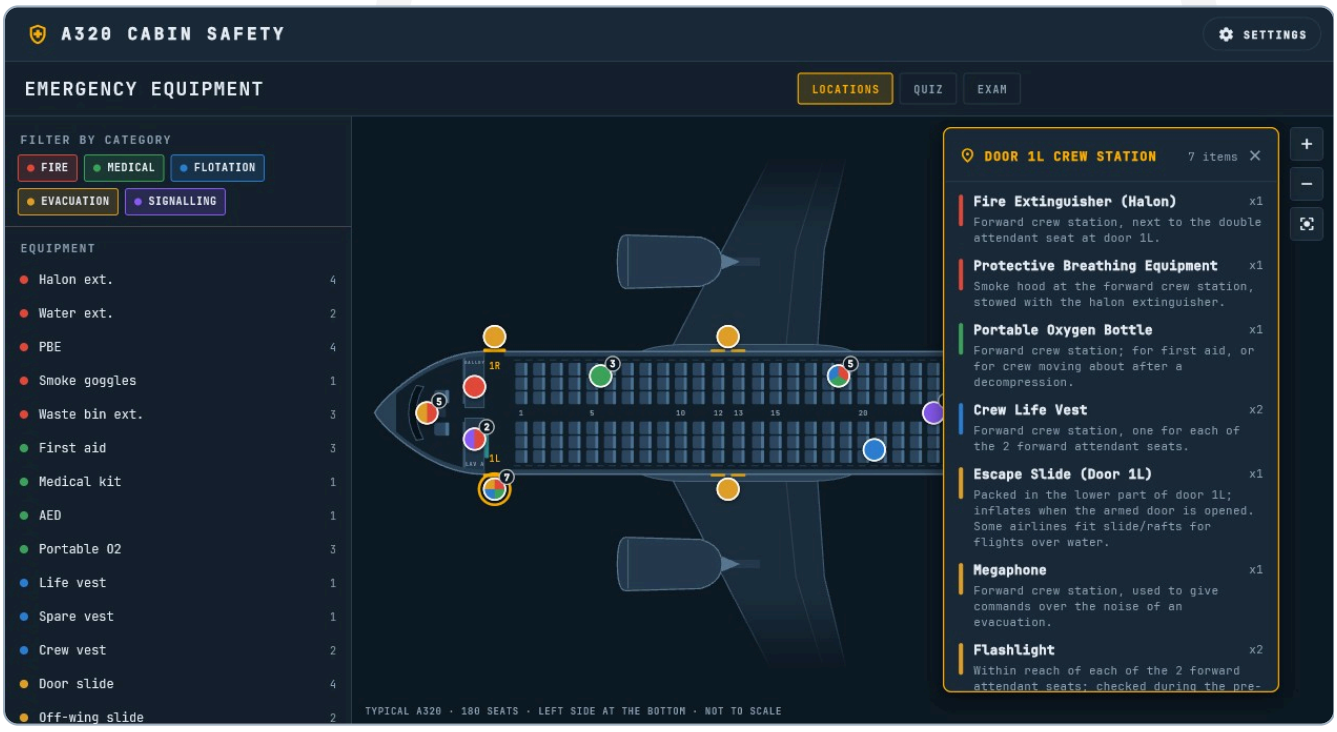

The chart shows the whole aircraft from above, with the nose on the left.

Reading the chart

- The aircraft's **left side** (the L doors) is at the **bottom**, as on any top view.
- Amber bars on the fuselage are the doors **1L, 1R, 2L, 2R** and the four overwing exits.
- Teal blocks are the five attendant seats.
- Each **marker** is one stowage location. Its colours are the categories stowed there; the small number is how many items.

Seeing what is stowed

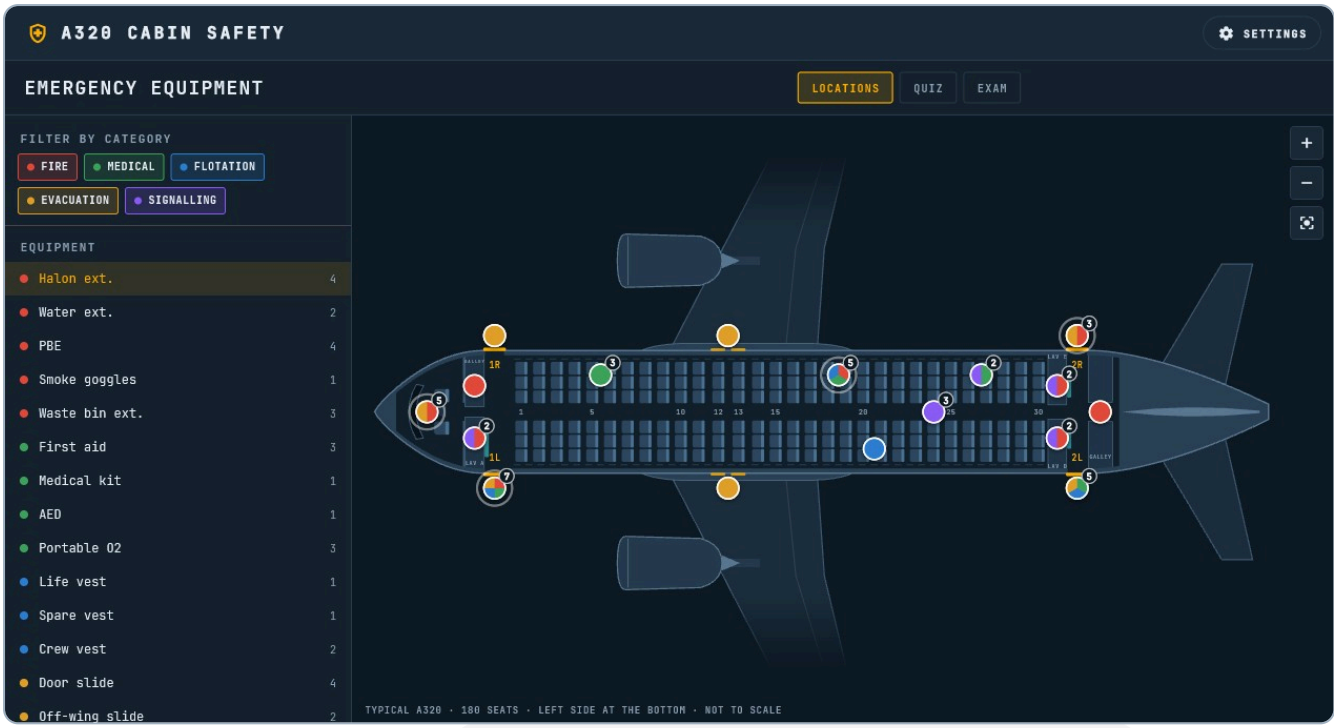

1. Tap a marker.
2. A card lists every item there, with its quantity and a short note.
3. Tap the **X** or an empty part of the chart to close it.

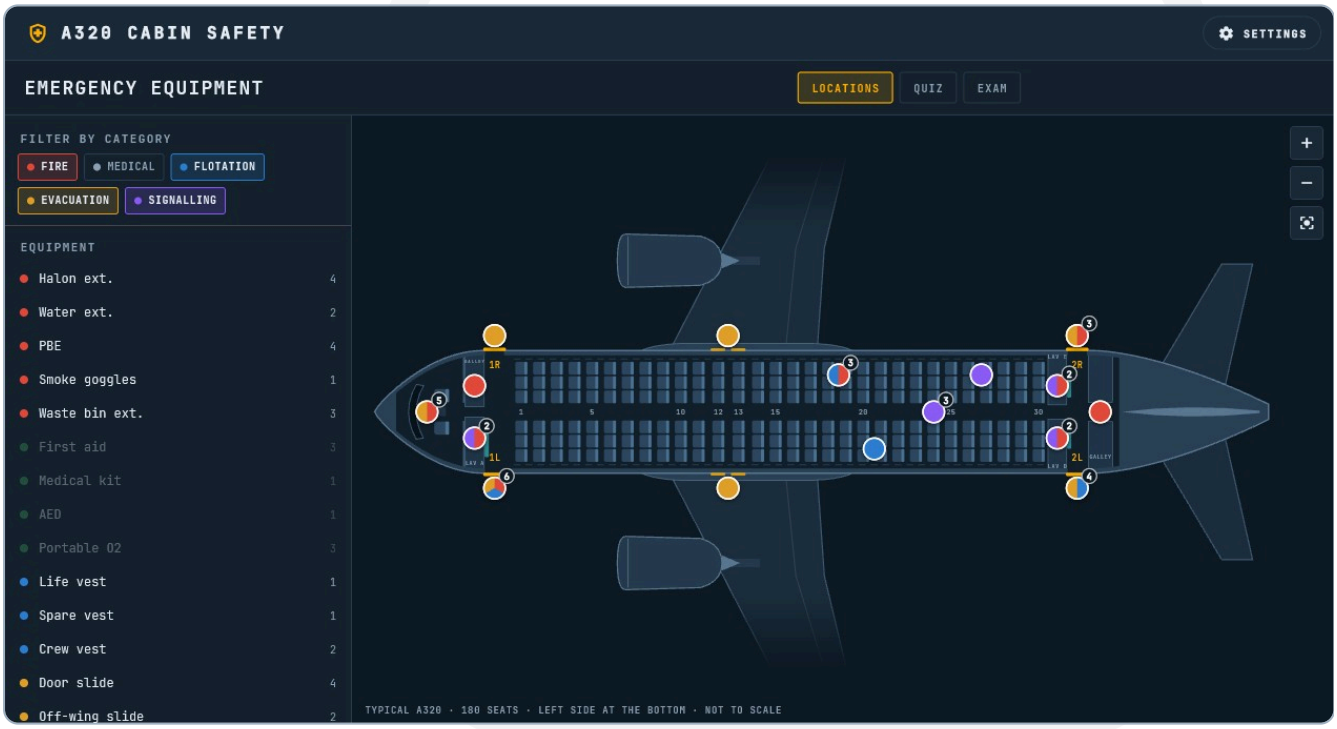

The Door 1L crew station holds 7 items

Highlight and filter

- Tap an item in the **EQUIPMENT** list: every location that holds it pulses. Tap again to stop.
- Tap a category under **FILTER BY CATEGORY** to hide it; tap again to show it.

Halon extinguishers highlighted: flight deck, door 1L, mid-cabin and door 2R

MEDICAL items hidden with the category filter

Zoom

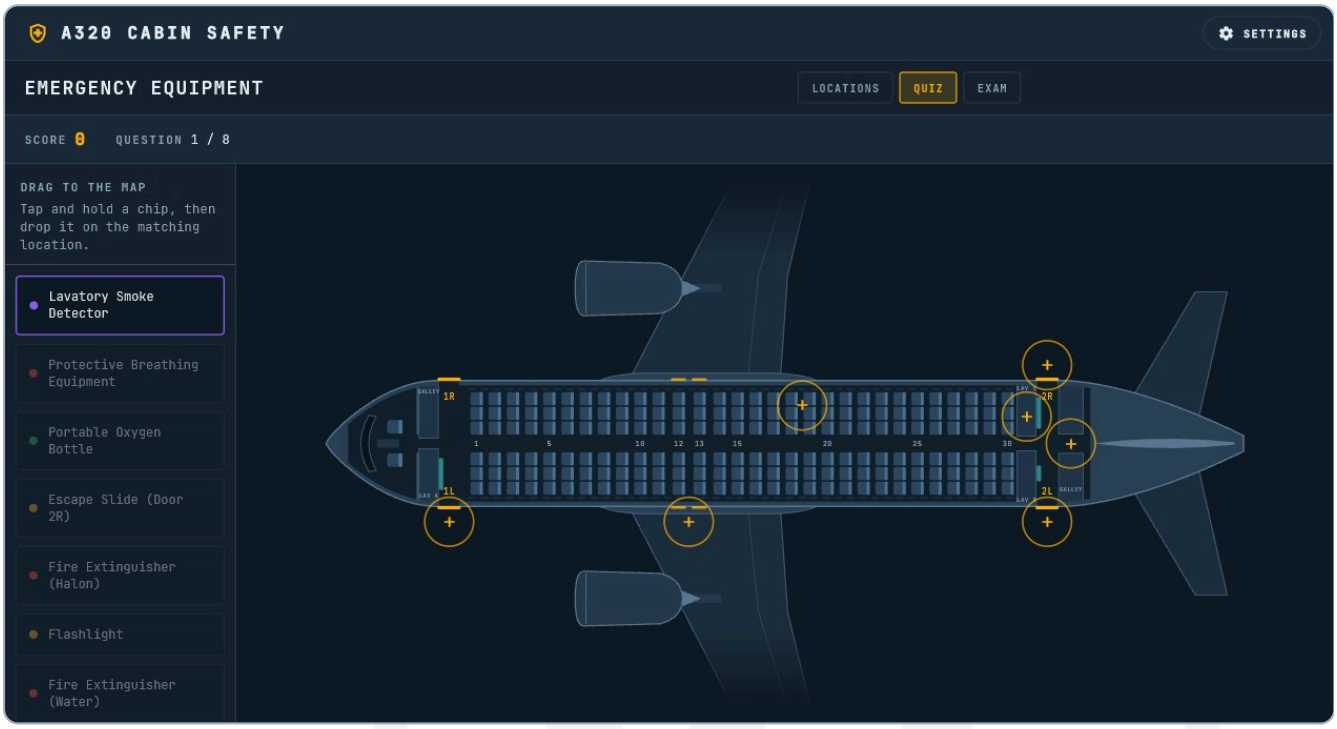

Use + and -, or two fingers on a tablet. The target key returns to the whole aircraft.

CHAPTER 05

QUIZ

Practice: eight items at random, one at a time, with right or wrong shown on each drop.

1. Tap **QUIZ**.
2. Press and hold the bright chip at the top of the list.
3. Drag it onto the matching location circle on the chart and let go.
4. Repeat until all 8 items are placed.

A quiz round: the current item is the bright chip at the top

Result	Points
Right on the first try	10
Right on the second try	5
Wrong twice	0 and the answer is shown

At the end, **ROUND COMPLETE** shows your score (maximum 80), your best score and every missed item with its correct location. Tap **NEW ROUND** or **BACK TO MAP**.

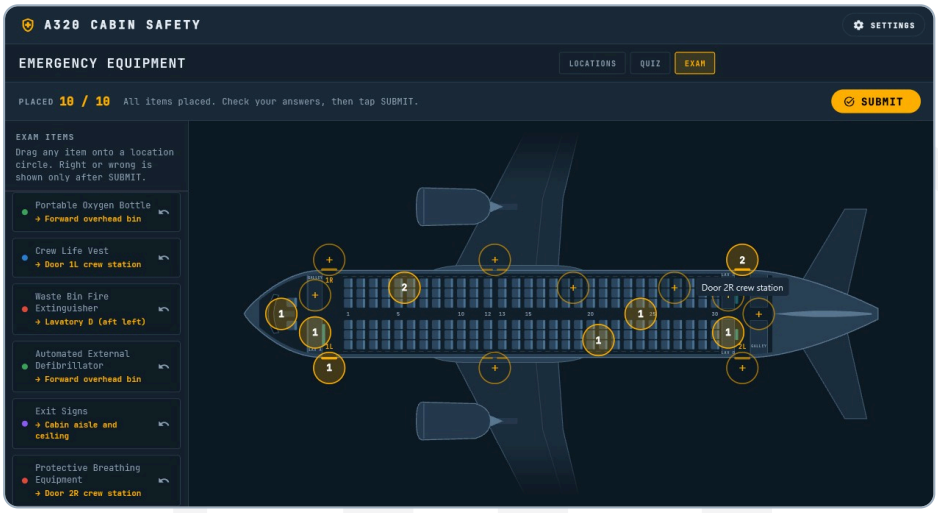

> **MORE THAN ONE RIGHT PLACE**
> Many items are stowed in several places (for example four halon extinguishers). Any place that holds that kind of item is right, and a round never asks for the same kind of item twice.

CHAPTER 06

EXAM

Ten items, shuffled. Place them in any order; right or wrong is shown only at the end.

1. Tap **EXAM**.
2. Drag any item from the list **sideways** onto a location circle. Every one of the 17 locations is a circle, so the chart gives no hint.
3. The item shows where you put it, and the circle shows how many items it holds. To change an answer, drag the item again, or tap ↶ to take it back to the list.
4. When all 10 are placed, **SUBMIT** lights up. Tap it.

All 10 items placed: SUBMIT is ready

The result

EXAM RESULT shows how many of the 10 were right, the percentage and your best exam score on this device. Below it, every answer: wrong ones first, in red, with the correct location; right ones in green. Tap **NEW EXAM** for a new set of 10 items, or **BACK TO MAP**.

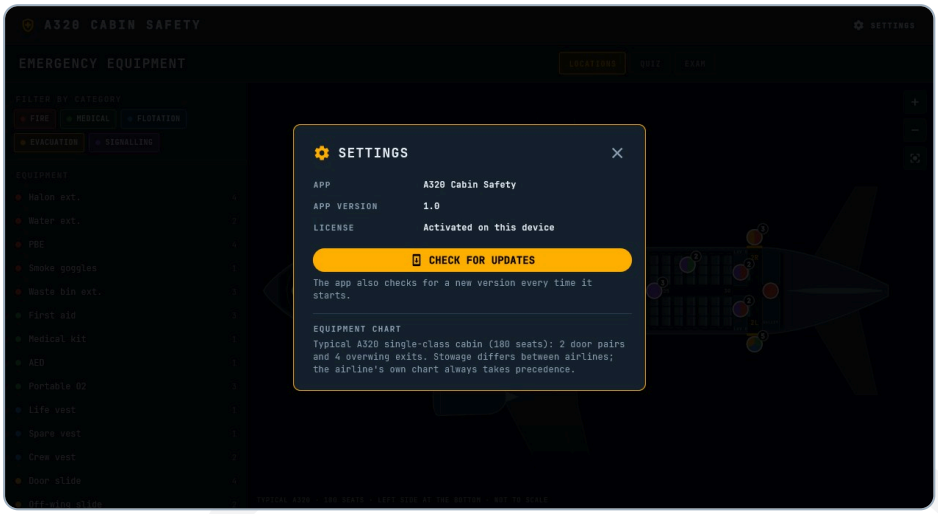

EXAM RESULT: 8 of 10, 80%, with the two wrong answers explained

CHAPTER 07

SETTINGS and Updates

The SETTINGS key at the top right.

SETTINGS

- **APP VERSION** and **LICENSE** status of this device.
- **CHECK FOR UPDATES** looks for a newer version. The app also checks every time it starts while online, and offers to download and install the new version.

CHAPTER 08

Troubleshooting

Messages you may see and what to do.

Message	What to do
Invalid license code	Check capital and small letters and try again.
This code has already been used on another device	Ask the administrator to release it, or use a new code.
No internet connection	Activation needs the internet once; connect and try again.
Too many attempts	Wait 15 minutes, then try again.
Could not check for updates	Connect to the internet and try again; the app keeps working offline.
Android will not install the file	Allow **Install unknown apps** for the app you opened the file with.
SUBMIT stays grey	Every exam item must be placed first; scroll the item list to find the rest.

CHAPTER 09

Important Notice

Please read before using the app for training.

TYPICAL LAYOUT ONLY

A320 Cabin Safety shows a typical A320-200 single-class cabin of 180 seats. The kind, number and stowage of emergency equipment differ between airlines and between aircraft. The airline's approved manuals and its on-board equipment chart always take precedence.

NOT AN APPROVED DEVICE

A320 Cabin Safety is not approved by the FAA, EASA, CAAP or any civil aviation authority and is not part of any aircraft or airline system. "A320" is a trademark of Airbus; Overdrive Interactive is independent and not affiliated with Airbus or any airline.
